Chart Key

OG:	Organically Grown
CS:	Conventional Seed
Maturity:	VE = very early E = early M = midseason L = late VL = very late
Shape:	R = round L = long Ob = oblong Ov = oval F = fingerling
Yield:	M = medium H = high
Storage:	F = fair G = good E = excellent
Scab Resistance:	M = moderate G = good H = high
State certification agency:	ME = Maine CO = Colorado NY = New York WV = West Virginia

SCATTERSEED PROJECT

Will Bonsall moved to Industry, ME, in 1971 to live simply and self-sufficiently. He runs Khadighar Farm. Will's Scatterseed Project hosts and preserves thousands of genetically diverse crops well-suited to Maine's seasons and soils. The project focuses on a few vegetable families and makes a valiant effort to keep viable a healthy selection of genetics. One of Will's main focuses is clonally propagated tubers with more than 700 varieties of potatoes and the most extensive Jerusalem artichoke collection in North America. Scatterseed is beyond heroic, maintaining 1200 pea varieties as well as other legumes: chickpeas, favas and runnerbeans.

Because two-season, or biennial, crops are hard to overwinter or store in our Maine climate, there are few growers in New England saving seed for crops such as rutabagas, leeks or turnips. However, Will tends a magnificent collection of these as well, concentrating on those crops that excel in our challenging climate.

To round out his collection and to emphasize self-sufficiency, Will plans to add what he considers the easier crops to his seed-saving work, like beans, tomatoes and grains.

The vital work of seed-saving doesn't leave much room or time for raising market crops. Will earns little revenue from his crusade. Scatterseed may be the only place on the planet where some of these varieties are still alive. Here a little more labor can mean huge success. Your donations make a real impact—more than \$2800 in 2021. Scatterseed relies on our support. Consider making a donation on the Potatoes, Onions & Exotics order form (p. 163 or online) to keep the work going and to ensure that we can continue to enjoy our world of vegetable wonders. To learn about Will's growing methods, check out his recent book
